HELMETS FOR HEROES.
Made with passion.

HIGH-PERFORMANCE FIREFIGHTER HELMETS –
PERFECT FUNCTIONALITY AND OUTSTANDING WEAR COMFORT
For over 50 years SCHUBERTH firefighter helmets have guaranteed the highest safety, quality, functionality, and wear comfort. They are specially developed for the type of operational conditions practiced in flash-over containers, conform the improved standards, and increased test criteria of the EN 443:2008. These inclusive parts complete new demands in the protect-ability of the helmets. Our recent expertise concerning material properties and manufacturing technology has made a contribution in optimizing the complete protective equipment. Thereby the risk of getting injured is lowered when used in fire fighting.

OPTIONAL CHARACTERISTICS / APPROVAL
- Approval for fire fighting on ships
- Electrical insulation capability of the helmet and helmet shell when wet
- Resistance in contact with liquid chemicals
- Suitable for use at low temperatures down to -40 °C
- Norm: EN 443:2008

EVERY SINGLE SCHUBERTH FIREFIGHTER HELMET CONTAINS A PIECE OF FORMULA 1
Many years of experience from this elite class of motor sports and its requirements to safety, shaped our philosophy and contribution to the development of every single SCHUBERTH high-performance firefighter helmet. Our commitment is not only the fulfillment of the normal specifications but their over-fulfillment. Our engineers are constantly researching new materials and solutions in order to live up to our guiding principle – to develop helmets of tomorrow for the toughest conditions.
FOCUS THE MISSION.
With perfect head protection.

THE UNIVERSAL GENIUS
- Innovative helmet shape (Type A) for large mobility
- Increased resistance to flames
- Helmet shell material made of further developed, highly temperature-resistant HighTemp-Fibre
- Multi-functional-adaptor (MFA-Fire) for adoption of different accessories
- New developed inner lining for maximum wearing comfort
- Head size quick adjustment system with screw closure
- Optimized weight for maximum safety
- Quick and easy replacement of spare parts without tools
- Freedom of movement, directional hearing

F300
PRODUCT BENEFITS.

1 HELMET SHELL
The helmet shell is made of HighTemp-Fibre and has an optimized weight for maximum safety. The fiber glass reinforced Special-Duroplast-Matrix is proven to resist breakage or penetration and is extremely resistant to heat and against all common chemicals.

2 INNER LINING
The highly adjustable inner lining with suspension mesh allows greater comfort by optimizing the weight distribution.

3 FRONT PANEL
The front panel is specially designed for the application of badge decal or department shield.

4 REFLECTIVE STICKERS
Reflective stickers for improved visibility.

5 PROTECTIVE EDGING
Optionally available.

6 INNER LINING
The highly adjustable inner lining with suspension mesh allows greater comfort by optimizing the weight distribution.

7 CHIN AND NECK STRAPS
The chin and neck straps are highly adaptable to individual head size/shape via the adjustable straps located at the front right and front left, on the rear of the neck strap and with the fastener on the chinstrap. The chin strap quick release is also easy to adjust with gloves on.

8 MULTI-FUNCTION-ADAPTOR
The Multi-Function-Adaptor (MFA-FIRE) enables quick and easy installation of various accessories.

- Innovative new helmet shape allows increased freedom of movement doing overhead work.
- The screw closure on the back of the head can also be adjusted easily to the precise head size, also with gloves on. An optional neck pad is also available.
F220

THE ALLROUNDER
- Approved helmet shape
- Increased resistance to flames
- Helmet shell material made of further developed, highly temperature-resistant HighTemp-Fibre
- Integrated visor tested to DIN EN 14458:2004 (suitable for inside attack)
- 3-point-chin-neck strap made from Nomex® material
- Height-adjustable inner lining
- Multi-Adaption-Lock: push button fasteners for direct attachment of full-face masks as well as accessories
- Lamp holder (front)

READY AT ANY TIME.
Just do your job.
The screw closure on the back of the head can be adjusted easily to the head size, also with gloves on. An optional neck pad is also available.

The head size quick-adjustment system for full-face masks with head strap is individually adjustable to the specific head size, thus allowing for a quick size adjustment of the suspension when using a full-face mask with head straps.

PRODUCT BENEFITS.

1 HEelmet shell
   The helmet shell is made of HighTemp-Fibre and has an optimized weight for maximum safety.

2 Inner shell
   The high-quality inner shell consists of polyurethane foam and combines high impact absorption with good insulation properties and high thermal resistance.

3 Inner lining
   Height-adjustable suspension with support mesh enables a high level of comfort through optimal weight distribution.

4 Lamp holder
   The integrated lamp holder facilitates the adaptation of a helmet lamp.

5 Visor
   The integrated visor protects against mechanical injury (i.e. through sparks or flying fragments). Impact and high thermal resistance tested to DIN EN 14458:2004 (suitable for inside attack).

6 Chin-neck strap
   The 3-point chin-neck strap is made from Nomex® material and provides a close, secure, and comfortable fit.

7 Quick release fastener
   The quick release fastener enables a quick and optimally comfortable opening and closing of the 3-point chin-neck strap.

8 Multi-adaptation-lock
   Multi-Adaption-Lock: push button fasteners for direct attachment of full-face masks as well as accessories.
THE NEW CLASSIC

- Traditional helmet shape
- Increased resistance to flames
- Helmet shell material made of further developed, highly temperature-resistant High-Temp-Fibre
- 3-point chin-neck strap made from Nomex® material
- Height-adjustable inner lining
- Head width adjustment with screw closure
- Wide range of accessories
- Electrical insulation capacity E2/E3
- Protection against contact with liquid chemicals
- Solas approved

WHEN EVERY SECOND COUNTS.

Trust in your gear and go on.
ALWAYS ON DUTY.

It’s a SCHUBERTH.

THE TRADITIONAL

- Traditional helmet shape
- Increased resistance to flames
- Helmet shell material made of further developed, highly temperature-resistant High-Temp Fibre
- 4-point chin-neck strap made from leather
- Height-adjustable inner lining
- Wide range of accessories
- Electrical insulation capacity E2/E3
- Protection against contact with liquid chemicals
- Solas approved

F120 PRO
Youth fire brigade
- Multi-Function-Adaptor (MFA-FIRE) enables quick and easy installation of various accessories
- Suitable for use at low temperatures down to –20 °C
- Adjustable side vent is standard
- High wearing comfort and secure fit due to the ergonomic and adjustable inner lining
- Low weight

- With Vellvitec® Z+ sweat band and screw closure as standard
- Available with 2-point chinstrap made of leather or textile and 4-point chinstrap with click closure
- Various accessories available
- White edge protection is standard
- Comes with the DJF-logo as a standard, with the option to have your individual youth fire brigade logo applied
